Haymaking is over and the steam thrasher is heard in the land.

Oats are yielding anywhere from a little less than nothing to 15 bushel per acre. Most people will start their next year's crop in the garden for want of seed to sow a larger area.

Joe Brashares is the champion haymaker. With the help of two high priced hands Joe hauled and mowed away three large loads one afternoon, but then he had the advantage of a good horse-hay-fork and only about 100 yards to haul it. We are not so sure about the third load as it was near night and our digestive apparatus began such intense gnawing that we were reminded that it was supper time, so we left just as Joe was drawing the third load to the barn, but have always hoped that he got to the barn the same day.

If anybody else wants to trade let him come on, Gene is ready for another trade.

We see according to the papers that W. H. Taft denies the Divinity of Christ, and has been endorsed by the liquor league for president of the United States. We wonder how many professors of religion will walk up to the polls, this fall and cast their ballots in favor of such a man as that? Or how many feel that the country will be safe under such chief executive as that? Don't all speak at once and get us confused, but if you will vote for him and help to elect him, there is no punishment too severe for you and don't never whine in our presence.
